

OMNICHANNEL RETAIL ANALYTICS

Final Business Report

Multi-City India | FY Analysis | Python · SQL · Power BI

EXECUTIVE SUMMARY

This project analyzes omnichannel retail sales performance across multiple Indian cities using Python, SQL, and Power BI. The objective was to identify revenue trends, product performance, customer purchase behavior, and city-wise opportunities. The dashboard reveals strong growth momentum, high dependence on Electronics, and clear opportunities for improving Average Order Value (AOV) through targeted city strategies.

TOTAL REVENUE

Rs.8.51M

All Cities Combined

TOTAL ORDERS

19,000

Recorded Orders

MoM GROWTH

+6%

Month-on-Month

AVG ORDER VALUE

Rs.449

Overall AOV

METHODOLOGY

1

Python – Data Cleaning & Preparation

Cleaned raw sales data, handled missing values, and standardized formats for downstream analysis.

2

SQL – Business Analysis

Performed revenue aggregation, product/category analysis, order trends, and city-wise KPI derivation.

3

Power BI – Visualization Dashboard

Built KPI Cards, Revenue by Product, City Analysis, Seasonality Trends, and Units Sold Dashboard.

KEY FINDINGS

Product Category Performance

Category	Revenue Share	Trend
Electronics	68% – 70%	Strong
Home Decor	~15%	Growing
Beauty	~8%	Stable
Grocery	~5%	Stable
Clothing	~4%	Stable

City-wise Revenue & AOV

City	Revenue	AOV (Rs.)	Rank
Hyderabad	Rs.1.30M	475	#1
Delhi	Rs.1.26M	463	#2
Kolkata	Rs.1.21M	448	#3
Bengaluru	Rs.1.19M	437	#4
Chennai	Rs.1.13M	431	#5

Seasonality Insights

Q4 Revenue Share

32–35%

Festive season dominance

- Strong spikes during festive months
- Q4 is the highest revenue quarter
- Opportunity for pre-season campaigns
- Start festive campaigns in October

ACTIONABLE RECOMMENDATIONS

Revenue Growth

- Expand Electronics inventory and premium variants
- Launch accessory bundles with electronics

City Strategy

- Aggressive growth campaigns in Bengaluru
- Retention offers in Delhi & Hyderabad
- Improve Chennai basket size via combo offers

AOV Improvement

- Minimum-spend free shipping threshold
- Add upsell suggestions at checkout
- Create curated product bundles

Seasonal Planning

- Start festive campaigns in October
- Increase inventory before Q4 demand surge
- Offer early-bird discounts

Customer Retention

- Loyalty points program
- Repeat purchase coupons for Beauty/Grocery
- Personalized offers based on city behavior

CONCLUSION

The business is growing steadily with strong category leadership from Electronics and high-value opportunities in premium markets like Hyderabad. By applying city-specific pricing strategies, improving low-AOV markets such as Chennai, and preparing early for festive season demand, the company can significantly increase profitability and customer lifetime value. The recommended combination of inventory expansion, AOV improvement tactics, and customer retention programs positions the business for accelerated growth in the coming quarters.
